

COUNTY-LEVEL ECONOMIC AND DEMOGRAPHIC PROFILES RESOURCES

At the County Planning Team Follow-up Workshops held in June 1999, team members requested assistance in locating sources for county-level trend information. The following list has been developed in response to that request. This is NOT a comprehensive list but it is intended to provide some easily accessible resources for examining county trends. Please notify AOC staff if you have other resources to recommend for inclusion on the list—455 Golden Gate Ave; San Francisco, CA 94109; 415-865-7654; jack.urquhart@jud.ca.gov.

All California Counties

The Demographic Research Unit of the California Dept. of Finance www.dof.ca.gov/html/demograp/druhpar.htm

All California Counties

Annual population estimates of the State, counties and cities are provided by the Unit. Information on housing units, vacancies, average household size, components of population change, and special populations are also available. The data are used in determining the annual appropriations limit for all California jurisdictions, to distribute State subventions to cities and counties, to comply with various State codes, and for research and planning purposes by Federal, State and local agencies, the academic community and the private sector.

The Unit projects the State and county population by age, race/ethnicity and sex, K-12 enrollment and high school graduates, and post-secondary education enrollment. As direct inputs to the State Budget, the Unit produces short-term annual statewide projections of the population by age and K-12 Average Daily Attendance.

Center for Continuing Study of the California Economy www.ccsce.com

All California Counties

The Center for Continuing Study of the California Economy (CCSCE) has become the recognized source of independent information about long term trends in California. CCSCE was founded as an independent, private economic research organization specializing in the analysis

and study of California. CCSCE focuses on long term economic and demographic trends in the state and its major economic regions.

CCSCE works with private companies and public institutions that require an explanation and analysis of the growth process as well as detailed quantitative projections. CCSCE has developed a proprietary model to project long term economic trends in California based on a detailed analysis of the prospects of California industries within the framework of national and global trends.

CCSCE uses its findings to help decision makers in both the private and public sector make long term strategic plans regarding business decisions and public policy.

CCSCE activities include research projects on the California economy; CCSCE's annual series of projection reports; customized long term economic and demographic projections; database products; and senior management briefings, presentations, and speeches. CCSCE also participates as a research partner in public policy projects related to economic and demographic trends in California.

The Annual Profile Series for 20 counties

Butte	Humboldt	Nevada	Siskiyou
Colusa	Lake	Placer	Sutter
Del Norte	Lassen	Plumas	Tehama
El Dorado	Mendocino	Shasta	Trinity
Glenn	Modoc	Sierra	Yuba

These profiles contain useful and up-to-date local statistical data for counties and their incorporated cities. Each profile contains over five hundred statistics in the general categories of population and components, labor, income, construction and housing, and business and industry. Profiles are \$25.00 each. This is an inexpensive way for organizations to obtain the data they need for market research and analysis.

Counties included:

Merced

San Joaquin

Stanislaus

The Center for Public Policy Studies at CSU, Stanislaus is a non-profit, non-partisan entity dedicated to research and public education about important policy issues and to providing a forum for discussing public policy issues with community representatives, academics, and policy makers in the CSU Stanislaus service area. The center is committed to facilitating regional and community problem-solving through activities and research projects that bring together diverse constituencies and perspectives to clarify issues, consider options, and build consensus.

The Policy Center mobilizes and coordinates the research and education talents of the CSUS faculty and partners to accomplish the following: collect and analyze information in order to help policy makers in the northern San Joaquin Valley and adjacent foothills make informed public policy decisions; provide opportunities for people to come together to hear and discuss the results of our research in order to improve the quality of public dialogue about important policy issues.

The work of the Center focuses on: the economy, natural resources, population and demography, governance, and community development.
